MURALSWALLPAPER HONORS 100 YEARS OF BAUHAUS

A BREAKDOWN OF GREEN BUILDING STANDARDS

MODERN SCHOOL SECURITY WITH SVIGALS+PARTNERS

sources

1. Verge Collection from Artaics

The Verge Collection is a modern interpretation of traditional geometric patterns found in woven, beaded and block-printed textiles. Verge offers fully customizable field and feature tile pairing solutions that will give design projects a consistent, cohesive aesthetic. The series' mural-like (feature) designs and simplistic (field) designs often have three or fewer colors, and complement one another in immediately adjacent applications or in spaces throughout a project. The collection designs are also available in natural stone, sintered glass and vitreous glass.

2. 480 Line from Healthe

The 480 line leverages Healthe's patented technology to deliver the right spectrum at the right time, enhancing wellbeing and productivity in commercial, managed care, hospitality and many other applications. Available in a variety of linear profiles, mounting options and lengths, it can be specified in nearly any type of configuration. The 480 line derives its name from the wavelength of light that corresponds to the body's peak circadian sensitivity. With its engineered spectrum, the 480 series luminaires optimize circadian impact.

3. Dekton Stonika Collection from Cosentino

The newest addition to the Dekton line, the Dekton Stonika Collection, draws inspiration from natural stone materials with both shine and durability. New findings in the manufacturing process allow for sharper designs and, in turn, an ultra-realistic appeal. The Dekton Stonika Collection includes six colors—Olimpo, Bergen, Arga, Taga, Sogne and Korso—bringing the total color offering to 53. The Dekton line has a high resistance to UV rays, scratches, stains and thermal shock. It is available in large format and a variety of thickness.
